About Me

Creative and detail-oriented developer with a passion for building clean, user-focused solutions.
Open to freelance and full-time opportunities.
Always ready to learn, adapt, and deliver with excellence.

Skills

- Frontend
- Backend
- CMS & E-commerce
- Mobile & Desktop App
- Game Development
- Database
- AI & Data process

Language

- English

Education

- **Bachelor of Computing in Computer Science**
  National University of Singapore Expected Graduation: 2016
  Focused on hands-on development using React, React Native, Python, and Unity.
  Built web and mobile apps, interactive 2D/3D games, and AI-powered tools.
  Used Python for web scraping, data processing, and machine learning applications.
  Developed multiple Unity3D projects with C#, including gameplay mechanics, physics systems, and UI design.
  Participated in coding challenges and team-based software development projects.

Experience

- **Frontend Web Developer**
  2017 – 2021
  Built responsive web apps using React, focusing on clean UI, reusable components, and API integration.
  Collaborated with teams to deliver fast, user-friendly interfaces.

- **Academic & Technical Projects**
  2021 – 2024
  Completed university projects using React, React Native, Python (AI, scraping, data), and Unity.
  Gained experience in full-stack development, app architecture, and collaborative coding.

- **Freelance Developer** 2024 – Present
  Delivering web, mobile, and game apps via Upwork, Freelancer, and private clients.
  Skilled in Next.js, Django, Shopify, and Unity, with a focus on performance and UX.
